The use of strong saturated colors makes a statement, as seen in the master bedroom and bathroom that also features taupe tones for contrast.

Inspired by three natural colors, the sea, sand, and greenery. The chosen paint palettes promise to pair well, granting a soft balanced scenery yet timeless.

The merge of the selected materials and textures complement each other, and the use of strong neutral cool colors works perfectly as a sophisticated backdrop for the interior space.

We adhered to an inviting simple palette of taupes to complement the bathroom's natural materials.

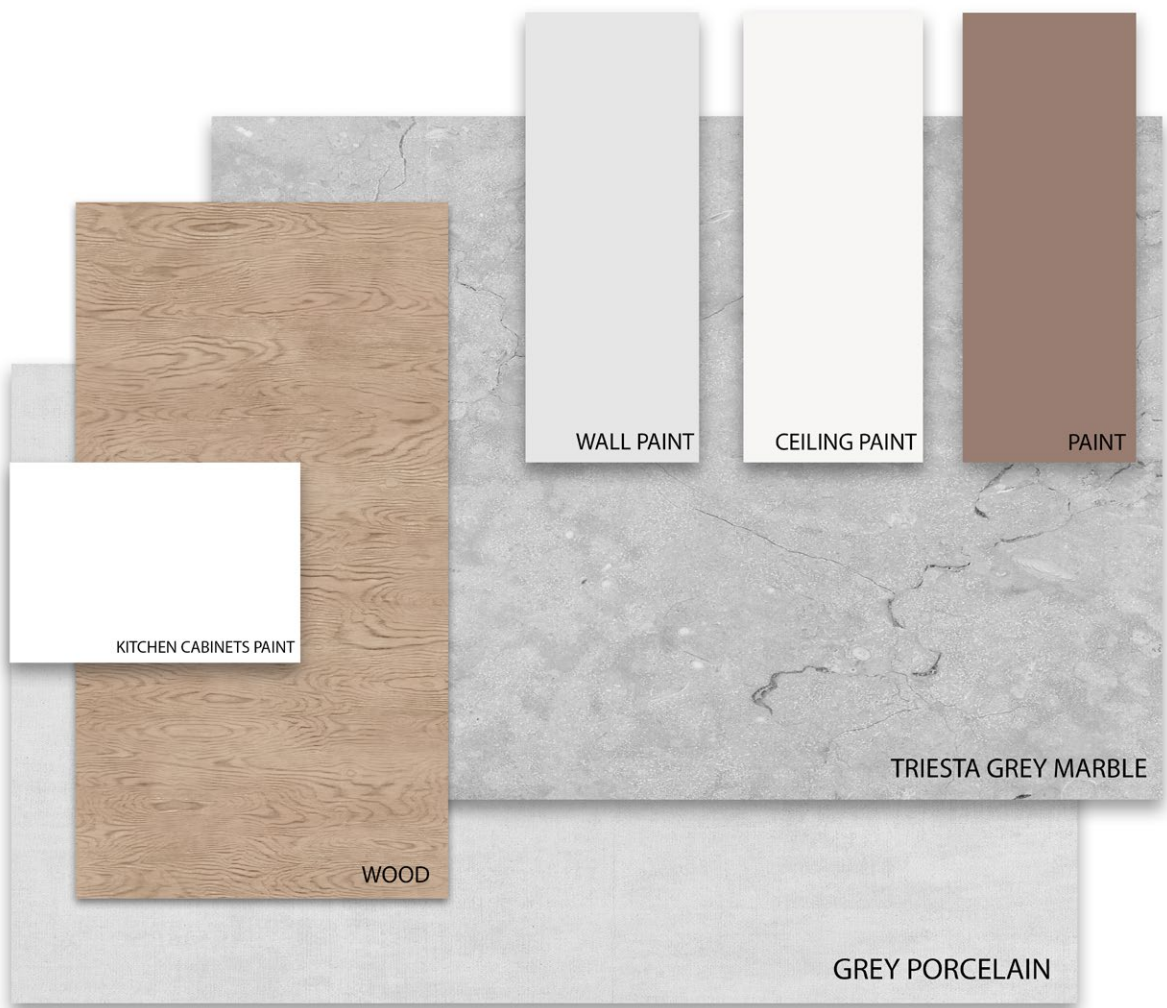

The soft, light grey is a great color mix to keep things neutral while adding some edge to your villa.

It brings in the cooling colors of granite and concrete, embracing the hygge style. The blend of natural material and soft textures like the Triesta grey marble and porcelain help shape the residence into a cozy nest.
